	Vulnerable Structures	None	None	None	Light	Moderate	Mod./Heavy	Heavy	V. Heavy	V. Heavy

^{*}Estimated exposure only includes population within the map area.

Population Exposure

Structures

Overall, the population in this region resides in structures that are highly resistant to earthquake shaking, though some vulnerable structures exist. The predominant vulnerable building types are reinforced masonry and unreinforced brick with timber floor construction.

Historical Earthquakes

Date	Dist.	Mag.	Max	Shaking			
(UTC)	(km)		MMI(#)	Deaths			
2004-07-18	301	5.4	V(1k)	1			
1987-03-02	315	6.5	VIII(16k)	0			
1968-05-23	277	7.2	IX(1k)	3			

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
